➤ What are Antonyms?

Language becomes meaningful not only through words that are similar in meaning but also through words that express contrast. Antonyms are words that have opposite or nearly opposite meanings. They help us understand ideas more clearly by highlighting differences, distinctions, and contrasts.

➤ Types of Antonyms Asked in NDA Exams

1. Direct Antonyms:

These are straightforward questions where you choose the word with the opposite meaning.

Example: Generous – (a) Kind (b) Selfish (c) Honest (d) Rich

Answer: (b) Selfish

2. Contextual Antonyms:

The meaning of the word is inferred from how it's used in a sentence, and the antonym is chosen accordingly.

Example: He was praised for his diligence at work.

Options: (a) Carelessness (b) Honesty (c) Energy (d) Patience

Answer: (a) Carelessness

3. Near Antonyms (Subtle Contrast):

Some words may not be exact opposites but reflect a contrasting quality or tone.

Example: Optimistic – (a) Cheerful (b) Joyful (c) Pessimistic (d) Proud

Answer: (c) Pessimistic

4. Idiomatic or Phrasal Antonyms:

Idioms or phrases may also require you to pick a word or phrase that gives an opposite meaning.

Example: He hit the nail on the head.

Options: (a) Missed the point (b) Was exact (c) Was quick (d) Lost the game

Answer: (a) Missed the point

5. Prefix/Suffix-Based Antonyms:

Words formed using opposite prefixes (like un-, in-, dis-) are also tested.

Example: Approve – (a) Disapprove (b) Accept (c) Recommend (d) Praise

Answer: (a) Disapprove

➤ Strategy Tips

- Understand the root meaning of the word before choosing its opposite.
- Carefully analyze the tone—formal, informal, positive, negative.
- Eliminate closely related words to narrow down to the opposite.
- Practice with a variety of sentence structures.
- Learn common prefixes/suffixes that indicate opposites.

"To understand a word completely, learn not only what it means, but also what it does not mean."
